Suction hoses made of EVA

Suction hoses made of EVA for industry and domestic application

***Braided hoses made of EVA in all RAL-colors
and available in various diameters and versions***

Application: craft/industry, home, car wash, floor care, central suction systems, professional industrial cleaning, swimming pool system

For vacuum up to 5m water column and temperature resistant from -45°C to 65°C.

TRUFLEX® 92.90

Suction hose, standard version

The hose is light, very flexible, weatherproof, resistant to abrasion, shows a smooth inner surface and has excellent recovery properties in case of strong radial deformation.

Dimensions: i.d. 20mm to i.d. 100mm, rolls 30m, fixed lengths on customer's request

color: light grey, special colors possible on customer's request

Versions: braided*, antistatic**, electrically conductive***

Short delivery time due to stockpiling of common dimensions

TRUFLEX® 92.90 L

Suction hose, light version

Due to its round cross sectional profile, the hose has excellent mechanical features and attains test values that are significantly above the requirements of DIN EN 60312.

Dimensions: i.d. 25mm to i.d. 50mm, rolls 30m, fixed lengths on customer's request

color: silver, special colors possible on customer's request

Versions: two-colored, braided*, antistatic**, electrically conductive***

TRUFLEX® 92.90 LC

Suction hose, light version, conical rising

Profile features as TRUFLEX® 92.90 L, moreover, the flow resistance is reduced by the conicity and the suction power is increased with simultaneous decrease in noise.

The risk of clogging is clearly reduced. The handling in confined spaces, p.e. in vehicle interior cleaning, is facilitated. The spare parts business remains with OEM.

Dimensions: fixed lengths on customer's request, conicity possible from i.d. 27mm to 50mm

color: individually on customer's request

Versions: two-colored, braided*, antistatic**, electrically conductive***

TRUFLEX® 92.90 LI

Suction hose, light version, integrated inner tube

Profile features as TRUFLEX® 92.90 L, furthermore, the field of application increases due to an integrated empty tube in hose which is available to accommodate electricity and water-conducting elements.

Dimensions: fixed lengths (max. 2375mm) on customer's request, diameter on request

color: on customer's request

Versions: conical, two-colored, braided*, antistatic**, electrically conductive***

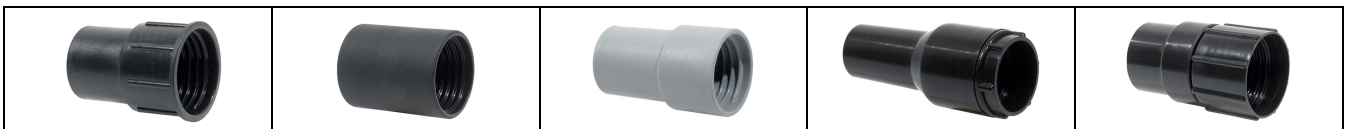

Marketing advantages of braided and two-colored hoses:

Due to the combined color and design possibilities, p.e. with individual braiding, the recognition of your products increases. The new styling leads to a high valency and can contribute to a rise of your sales figures.

* Special model; to be delivered only in fixed lengths with assembled connector elements

** with surface resistance $\leq 10^{11} \Omega/m$ (migrating antistatic)

*** with surface resistance $\leq 10^6 \Omega/m$
